

Little Comfort Farm Produce

The meat from Little Comfort Farm is produced to Soil Association standards which avoid the use of artificial fertilizers, pesticides and the routine use of veterinary medicines. We aim to allow the animals freedom to display their natural behaviour giving them plenty of space and as far as possible rear them on home grown food.

The mixed nature of the farm with small numbers of livestock means that it is not always possible to ensure a continuous supply of all products, however there should never be a long delay in fulfilling your order.

We are happy to take orders of any size, special requirements for cutting can usually be accommodated and larger orders delivered locally or can be collected from the farm.
